

END SCENE CLIP

CORPORATE GAME

This video can be played by our actors at the end of your game, it's not mandatory to create a video. Once you create it, upload it to Youtube or any other platform (you can even have it on your google drive or dropbox or other cloud storage) and paste the link to it in the "MyGame" area.

This clip should be recorded by a senior manager within the company/organization **who is not present during the game.**

Alex Wise and Omega are characters within the game so it is cool if the person recording the video will mention their names as if he knows them for a long time and has interacted with them in the past.

Here is the text template:

"Hi everybody,

I wish to thank Alex Wise despite everything that's happened and of course all of you for saving our company.

I had no doubt that you are the right people for the task – Only our (marketing/R&D/sales/management) team can succeed in handling such complex missions.

(here you can say a few words about the achievements of the department in the last year/quarter, future projects, KPI, Etc.)

I will see you all soon and together we will continue to do what we do best.

Yours truly,

Omega, _____ (your name)"
